

Mental Health Care Plan Information

Certain individuals are eligible for bulk-billed counselling, funded by Medicare under a Mental Health Care Plan (MHCP). This referral, issued by a general practitioner (GP) means that over the course of 12 months, individuals have access to both:

- 10 individual counselling sessions – an initial six, followed by a GP review appointment, then the last four.
*Please note: In 2020 the Federal Government announced a COVID-19 mental health support measure of an additional 10 counselling sessions on a MHCP. Until 30/6/2022, Victorians will be able to receive 20 counselling sessions per calendar year under a MHCP.
- 10 group counselling sessions – which can be used with a different practitioner than the counselling sessions.

Hampton Park Secondary College has a partnership with a psychologist who supports our students via a MHCP, at no cost to families. Melanie is very knowledgeable in the area of adolescent mental health and has years of experience working with young people and their families, to address adolescents' needs.

Melanie visits the college one day per week to provide in-person support, and offers telehealth options to students as required, when in-person support is not possible because of COVID-19 safety protocols, such as remote learning.

If you would like more information regarding the services that our clinician provides, please contact us:

Wellbeing Team – 8795 9400 or contact_wellbeing@hpsc.vic.edu.au.

How does my child access a Mental Health Care Plan for counselling?

1. You must book an appointment with your child's GP. Often, it is best to ask reception at the time of booking whether you need a double appointment, as GPs need to complete paperwork which may take longer than the standard 10 minutes.
2. Attend the GP appointment with your child. Inform the GP that you are there because you have discussed counselling with your child and the school, and you would like to access a Mental Health Care Plan.
3. The GP will take you and your child through some paperwork, asking your child some questions about their general health, family history, how they are feeling, and what they are having difficulty with.
4. The GP will put this information into a document that is generally between four and six pages long. This document will be printed and given to you, to return to the school. This document is kept confidential and will only be shared with the clinician that will be seeing your child.
5. The MHCP needs to be provided to the Wellbeing Team at Hampton Park Secondary College (hardcopy or email), who will book your child's appointment with the clinician. In-person appointments will appear on your child's Compass timetable as 'meeting,' so that they are reminded when to attend their appointment.
6. Occasionally, GPs may address the MHCP to a local psychologist instead of to the one at our college. If the clinician on your paperwork needs to be changed, please contact your GP. Some clinics may be able to reissue MHCP paperwork with the correct details, while others may require you to make another appointment.
