

# LAPTOP PROGRAM

Hampton Park Secondary College has implemented a one-to-one laptop program for all students in order to maximise their learning opportunities. To offset the cost of a laptop, almost all subjects have removed the need to purchase textbooks.

We provide an extensive range of software programs including Microsoft Office suite, as well as subject specific software and technical support throughout the school year.

For the 2022 school year, the college has created a resource to assist with the sourcing of laptops that meet the basic requirements to varying levels, as listed below. The link to this resource can be found below and on the college website.
